## TAMIL NADU – ABOUT THE STATE

---

TAMIL NADU, the southernmost state of India, bounded by the seas on the East and South Western Ghats on the west state of Andhra Pradesh and Karnataka on the north, is a land of sun and warmth, legends and lyrics, temples and towers and really the "Soul of the South". Formerly known as 'Madras State', 'Tamil Nadu', the name derived from the vernacular of its people. The archeological excavations support the existence of Dravidian habitation here from the palaeolithic times.

This land, that has seen the rise and fall of many ancient kingdoms who left behind their incredible cultural treasures, is a wide archive of ancient legacies which retains its oldworld charm. The Dravidian Dynasties that ruled here were mainly the Pandians from Madurai, the Cholas from Thanjavur and the Pallavas from Kanchipuram. During the middle part of 2nd millennium, the region was ruled by Vijayanagar kings from whom the power was seized by muslims. With the fall of Tipu Sultan in 1799, the territory was subjected to British rule till its accession to Indian Union after independence.

Divided into 38 districts, the state has a population of 72,147,030 as per 2011 census. The country undulates from the Western Ghats to the eastern plains except for the lower hills of Eastern Ghats that run through the centre of the region. The plateaus at higher altitudes nestled with pleasant hill stations and wildlife sanctuaries in the slopes are lapped with evergreen and deciduous forests, savannas, exotic plantations and subalpine vegetation. The midlands are having broad fertile belt along the river deltas, the coconut fringed coastal plains are at places arid and mineral content and the sea adjoining is rich in aquatic life. The important rivers Kaveri, Ponnaiyar, Palar, Vaigai, Tamirabarani, etc, flow eastwards. Climate is basically tropical but equable due to the proximity of the seas. Most precipitation falls in hilly areas remain cooler throughout the year while the plains receive moderate rainfall.

The headquarters of the state 'Chennai' was once a fishing village and the earliest foothold of East India Company. In 1639, a small fort v.z., 'Fort St. George' built here, gradually developed into 'George Town', later agglomerated as Madras City (Chennai), the oldest municipal corporation of India. The capital – venue of film studios, dance and music festivals, has many tourist attractions like Art Gallery - the oldest in India, an ancient Siva Temple Kapalaswarar, - famed for its typical Dravidian gopuram, the gothic styled Santhome Cathedral of Mylapore - possessing the remains of St. Thomas, Valluvarkottam in memory of Saint Thiruvalluvar, who wrote the world fame classic Thirukkural, Marina - the 2nd largest beach in the world, museum, Deer park, Snake park, Aquarium etc.

The place famous for its exquisitely woven silk sarees - Kanchipuram having 108 temples, is considered as one of the seven sacred cities of India. Mamallapuram famed for its Pallava monuments and sculptures and exotic beaches, is developed as a beach resort where the festival of Indian Dances held in January - February every year - a unique experience as the country's leading artists converges here. Chidambaram is having Natarajan Temple wherein Lord Siva is in the posture of a cosmic dancer. Tiruchirappalli - the venue of carnatic wars fought in the 18th century is known for its Rock Fort Temple, built on a tall massive rock of 83 meters. The headquarters of state's rice bowl - Thanjavur famed for the Brahadaswarar Temple with its splendour in Chola architecture, is the house of carnatic music. Rameswaram one of the sacred towns of India is known for the Ramanathaswamy Temple renowned for its magnificent longest corridors with thousand massive sculptured pillars lining it. Meenakshi Amman Temple at Madurai considered as one of the wonders of India for its towering gopurams. There are many more temples in the state where the ancient legends live on, in wood,

plaster, stones and rocks. The 'Land's End' of Indian Peninsular Kanniyakumari - a famous pilgrim and tourist centre is an ideal place to mediate at the Vivekananda Rock Memorial and to witness the sunrise and sunset, especially during the full moon days.

The queen of hill station 'Udagamandalam' sheltered by 2240 m. Doda Betta - the highest peak of Tamil Nadu, is the pride of Nilgiris crowned by the cluster of blue hazed mountains that waft the aroma of eucalyptus, coffee and tea plantations where the Todas – the primitive people of India dwell along its jungle tracts. Mudumalai Wildlife Sanctuary along these ranges represent rare fauna, reptilian and avifauna. Coonoor, Gudalur, Kotagiri, Kodaikkanal and Yercaud are the other beautiful hill stations. Health resorts at Hogenakal and Kuttalam Water Falls set amidst the lush green hills are known for its curative properties and the bracing climate. Vedanthangal - a major water bird sanctuary, historic Pumpuhar famous for its Art Gallery. Coimbatore - known as the 'Manchester of South India' because of its numerous textile mill, Velankanni, Pandi, Nagore, Palani etc., are the other places of interest.

*Fig 1: Valluvar Kottam*

Tamil Nadu, land of great culture and philosophies proudly presented great personages like Thiruvalluvar - the author of Thirukkural, Saint Thirunavukkarasu Swamigal, Poet Bharatiyar and Social reformer Periyar- a few of the many to mention. Considered as one of the most urbanized and industrialised state of India, still it is a rural land hence agriculture is the mainstay of the people. Well-knit by roads, railways and airways, the state is having a very good transport system, Sea - borne

traffic is handled by the artificial harbour at Chennai and Thoothukkudi. Harvest festival ' Pongal' is celebrated by one and all during January.

**PUDUCHERRY:** The non - contiguous French Settlements, Pondicherry (Puducherry) and Karaikkal in Tamil Nadu, Mahe in Kerala and Yanam in Andhra Pradesh became the Union Territory of India on 1st November, 1954. Historically the area was part of India, Pallava and Vijaynagar Dynasties till the arrival of French in 1673. Portuguese and Dutch vied each other for the possessions and finally it remained with the French till its merger with independent India.

Scattered in fifteen enclaves, the territory covers an area of 490 sq. kms having a population of 1,247,953 as per 2011 census, mainly involved in cultivation and fishing. The headquarters Puducherry having an oval shaped lovely beach, stately buildings, ornate temples and churches, is a beautifully planned town. The main attraction the world-famous Aurobindo ashram founded by revolutionary turned Saint Aurobindo in 1920, is a centre of intellectual and scientific activities. The Alliance Francaise, the French Institute, Romain Rolland Library, JIPMER, Museum, Botanical Gardens etc., are the other places of interest. Karaikal is full of French buildings. Mahe covered with hillocks and massive coconut trees is fertile belt. Yanam is comparatively a modern town.

## DESCRIPTION OF DATA

---

### 1. TOPOGRAPHICAL MAPS

Topographical Maps are detailed, large-scale maps prepared by the Survey of India that accurately depict the natural and man-made features of the land. These maps serve as a fundamental reference for planning, administration, and developmental activities in India.

They provide precise information on terrain, elevations, drainage, vegetation, settlements, transport networks, administrative boundaries, and land use patterns. Using contour lines and symbols, these maps help visualize the shape and features of the ground.

Topographical maps are used for:

- i. Infrastructure Planning: Supports planning and alignment of roads, railways, canals, pipelines, and power lines.
- ii. Urban and Rural Development: Aids in town planning, settlement expansion, and selection of suitable sites for public/private infrastructure.
- iii. Water Resource Management: Facilitates watershed analysis, irrigation planning, and identification of drainage and flood-prone areas.
- iv. Natural Resource Assessment: Enables mapping vegetation, soil, and land use for sustainable resource management.
- v. Land Records Correlation: Helps link cadastral maps and revenue records with actual ground features.
- vi. Boundary Verification: Used for proper identification and confirmation of administrative boundaries at various levels.
- vii. Enables identification of forest area.
- viii. Environmental and Ecological Studies: Useful in assessing terrain, slopes, and ecological sensitivity for conservation planning.
- ix. Disaster Management: Assists in flood, drought, and landslide analysis, and in post-disaster damage assessment.
- x. Defence and Security Applications: Provides essential terrain information for defence planning, border management, and surveillance.
- xi. Tourism and Recreation Planning: Helps identify trekking routes, viewpoints, and eco-tourism sites.
- xii. Educational and Research Purposes: Used as inputs in geographical, geological, and environmental studies.
- xiii. Legal purposes: An authentic and accurate spatial framework to support legal and judicial requirements.
- xiv. GIS Applications: Serves as a reliable base layer for any geospatial analysis.

These are accurate and authorized maps which provide a base layer for integrating and validating all spatial data, supporting accurate decision-making and efficient land administration.

Survey of India provides Topographical Maps at 1:250,000 scale, 1:50,000 scale and 1:25,000 scale.

## 2. ADMINISTRATIVE BOUNDARIES

Administrative boundaries represent officially demarcated divisions of governance & jurisdiction and are mapped and maintained by the Survey of India (SOI). These boundaries provide the foundational spatial framework for all administrative functions.

SOI maintains and updates boundary data at multiple hierarchical levels, ranging from International Boundaries, State Boundaries, Union Territory Boundaries, District Boundaries, Sub-District (Tehsil/Taluk) Boundaries, Village Boundaries and some Urban Area Boundaries.

Administrative boundary data of SOI is currently used in numerous ways, such as:

- i. Land and Revenue Record Management – verifying jurisdictional accuracy for land parcels and revenue collection.
- ii. Development Planning – identifying areas for infrastructure, welfare schemes, and resource allocation.
- iii. Disaster Management – coordinating relief efforts based on clearly demarcated jurisdictions.
- iv. E-Governance and GIS Integration – linking spatial boundaries with demographic, economic, and land use data for better decision-making.

*Fig 3: Administrative Boundaries: From International boundary to Village boundary*

### 3. DIGITAL ELEVATION MODEL (DEM)

The Digital Elevation Model (DEM) is a digital representation of the Earth's surface showing the elevation (height) of surface features. Survey of India (SOI) has prepared DEMs by digitizing and processing contour data from 1:50,000 scale topographical maps, ensuring consistent accuracy across the country.

A DEM depicts the natural terrain in three dimensions. It forms the foundation for terrain analysis, watershed delineation, infrastructure planning, and disaster management.

The DEM provided by SOI is highly used for:

1. Land Use and Development Planning – identifying suitable areas for roads, buildings, and public utilities based on terrain conditions.
2. Drainage and Irrigation Management – analysing slope and flow direction to design efficient water distribution systems.
3. Flood Risk and Disaster Management – mapping flood-prone or low-lying areas to support preparedness and mitigation efforts.
4. Infrastructure Projects – assisting in route alignment for roads, canals, and pipelines.

The SOI's DEM (10m resolution) thus serves as a foundational spatial dataset that enables accurate and authorized terrain-based decision-making for various administrative, developmental, and legal applications.

## 4. SOI PROJECTS

### I.NATIONAL HYDROLOGY PROJECT (NHP)

Survey of India is one of the Central Implementation Agencies in the National Hydrology Project (NHP) of Government of India which is intended for setting up of a system for timely and reliable water resources data acquisition, storage, collation and management. The Ministry of Jal Shakti, Department of Water Resources, River Rejuvenation and Ganga Rejuvenation (DoWR, RD&GR) is the Nodal Ministry for implementation of the project.

*Fig 4: Digital Elevation Model*

The data generated under NHP provide tools/systems for informed decision making through Decision Support Systems (DSS) for water resources assessment, flood management, reservoir operations, drought management, etc. NHP also seeks to build capacity of the State and Central sector organizations in water resources management using Information Systems and adoption of State-of-the-art technologies like Remote Sensing.

Survey of India was entrusted with the responsibility to generate, prepare and provide various types of Geo-spatial datasets i.e. mapping and preparing the Digital Elevation Model (DEM) of 0.5m & 3-5 m for River Basin areas (plain), up to 5 km on both the sides of river and GIS ready data of SOI Topo sheets on 1: 25 K scale.

## II.NATIONAL MISSION FOR CLEAN GANGA (NMCG)

This project is an integrated conservation mission, approved as flagship program by the Union Government in June 2014 accomplish the twin objectives of effective abatement of pollution, conservation and rejuvenation of the national river Ganga.

Objective of the Project was to generate High Resolution DEM and GIS ready database for the part of River Ganga with latest technology. The mapping of mainstream of river Ganga in five major states namely Uttarakhand, Uttar Pradesh, Jharkhand, Bihar and West Bengal covering major towns and cities along the river Ganga and its tributaries in these states with an area of Two lakh fifty thousand square km. To provide a major support to Ganga River basin Management by embedding GIS in different aspects of - planning and implementation at national/state/local levels; bringing GIS support in decision-making; enable a sound process of monitoring development and identifying critical hotspots. To make GIS data available at all levels and groups associated in this process – that helps bringing accountability and responsibility in policy decisions.

*Fig 5: LiDAR Point Cloud Data*

Survey of India was tasked to generate High-Resolution Digital Elevation Model (DEM) of 0.5-meter resolution and GIS based data for the part of River Ganga covering up to 10 km extent on both sides of the river using latest technology.

## III.CENTRAL MINE PLANNING AND DESIGN INSTITUTE (CMPDI)

Survey of India generated up-to-date digital topographical maps of 27 Major Indian Coal fields. Chhattisgarh, Jharkhand, Madhya Pradesh, Maharashtra & Goa, Meghalaya & Arunachal Pradesh, Orissa and W.B & Sikkim GD's Major Indian Coal fields covering an area of 30,488 sq.km. for Central Mine Planning & Design Institute (CMPDI), a subsidiary of Coal India Limited using aerial photographs and adequate ground checks. To generate the Topographical maps of the major coalfields on 1:5000 scale with 2-meter contour interval in Plains (in case of hilly terrain contour interval may be 3-5 meter as practical) in GIS digital format based on Digital Photogrammetric Techniques using high resolution aerial photographs and adequate ground verification. Survey of India also imparted training on data processing and interpretation to scientists of CMPDI at the initial stage on preparation of Topographical maps based on aerial photographs using digital photogrammetric technique.

#### IV. INTEGRATED COASTAL ZONE MANAGEMENT (ICZM)

To ensure effective protection of shore lines, coastal infrastructure, livelihoods and lives through improved coastal management a Coastal Management Program undertaken by Ministry of Environment & Forest (MoEF) and entrusted the work of supplying a requisite coastal data and vulnerability mapping, (involving hazard line demarcation of coastal areas) to Survey of India through its Integrated Coastal Zone Management (ICZM) Project.

The objective of the project was to delineate, map and benchmark the coastal hazard line all along the mainland coast of India under World Bank Assisted “Integrated Coastal Zone Management” (ICZM) project, where SURVEY OF INDIA had to generate a 0.5 meter elevation contour map on 1:10,000 scale as base map to delineate the Hazard Line for the entire mainland coast of India up to the maximum width of 7 km from shore line on the landward side.

#### V. NATIONAL URBAN INFORMATION SYSTEM (NUIS)

Survey of India has undertaken the task of mapping of 152 towns on 1:2000 scales for core area and 1:10,000 scale for the peripheral areas under National Urban Information Scheme (NUIS), of Ministry of Urban Development.

**1:10,000 Scale Survey:** Satellite Imagery of 152 towns had been received and scanning was done for 151 towns for thematic mapping. Thematic mapping of 132 towns has been completed and final product of 100 towns has been sent to State Nodal Agency.

**1:2,000 Scale Surveys:** Aerial Photography of 133 towns received and scanned. Control points of 126 towns have been completed. 2D feature extraction of 94 towns has been completed. Ground survey of 4 towns, using total station had been completed. Data pertaining to 89 towns has been sent to State Nodal Agency.

#### VI. SURVEY OF VILLAGES ABADI AND MAPPING WITH IMPROVISED TECHNOLOGY IN VILLAGE AREAS (SVAMITVA)

Survey of Villages Abadi & Mapping with Improvised Technology in Village Areas (SVAMITVA) Scheme is a Central Sector scheme launched by Hon’ble Prime Minister of India on National Panchayat Day i.e. 24th April 2020. The Ministry of Panchayati Raj (MoPR) is the Nodal Ministry for implementation of the scheme. In the States, the Revenue Department / Land Records Department will be the Nodal Department and shall carry out the scheme with support of State Panchayati Raj Department. Survey of India is the technology partner for implementation.

The scheme aims to provide ‘**record of rights**’ to village household owners possessing houses in inhabited rural areas using Drone Surveying technology. Ortho Rectified Image (ORI) & Digital Elevation Models are generated in Lab from images captured by drone.

The scheme provides an integrated property validation solution for rural India. The demarcation of rural abadi areas would be done using Drone Surveying technology. This would provide the ‘record of rights’ to village household owners possessing houses in inhabited rural areas in villages which, in turn, would enable them to use their property as a financial asset for taking loans and other financial

benefits from Bank. **Ortho Rectified Image (ORI) of 5 cm resolution** are generated from images captured by drone.

*Fig 6: Ortho Rectified Image and feature extraction of abadi area*

## VII. LARGE SCALE MAPPING (LSM)

Survey of India in collaboration with the State Government authorities is executing large scale mapping projects using Professional Survey Grade Unmanned Aerial Vehicle/ Drone, for generation of high-resolution Ortho-rectified imagery, digital elevation model & GIS enabled data. Currently LSM is being carried out in states/UTs of Haryana, Karnataka, Andhra Pradesh and Andaman & Nicobar Island. Ortho Rectified Image (ORI) of 5 cm resolution are generated from images captured by drone.

*Fig 7: Ortho Rectified Image and feature extraction*

## VIII. NATIONAL GEOSPATIAL KNOWLEDGE-BASED LAND SURVEY OF URBAN HABITATIONS (NAKSHA):

The **Department of Land Resources (DoLR)** has launched a pilot program titled "**NAKSHA**" — *National geospatial Knowledge' based land Survey of urban habitations* — for the creation of accurate and up-to-date

**land records in urban areas.** Survey of India, as the technical partner, will carry out high-resolution mapping using manned and unmanned systems. The project aims to modernize urban land records through advanced aerial survey technologies. The launch marks a significant step toward accurate, up-to-date urban land records and better urban governing.

### Key Features of the NAKSHA Program:

Technologies Used:

- i. Nadir Camera for generation of ORI and DEM and creation of 2D dataset
- ii. Multi-angle Camera (1 nadir + 4 oblique) and data acquisition for generation of ORI, DEM, 3D reality Model and creation of 3D GIS dataset.
- iii. Multi-angle Camera with LiDAR Sensor for generation of ORI, DEM, 3D reality Model and creation of 3D GIS dataset.
- iv. Coverage: Pilot to be implemented in 128 cities across India. The project is in progress.
- v. Deliverables: ORI (5 cm resolution) and DEM (50 cm resolution).

## IX. ATAL MISSION FOR REJUVENATION AND URBAN TRANSFORMATION 2.0 (AMRUT 2.0):

A Memorandum of Understanding (MoU) was signed between the Survey of India (SoI) and the Ministry of Housing and Urban Affairs (MoHUA) for the execution of drone-based surveys under the AMRUT 2.0 GIS Sub-Scheme.

The objective of this collaboration is to generate large-scale urban geospatial data using professional survey-grade Drones/UAVs for small and medium towns with populations ranging from 50,000 to 99,000. This initiative supports evidence-based urban planning and contributes to the creation of smart, resilient, and sustainable towns in India.

### Key Highlights:

- Technology Used: High-precision survey-grade drones/UAVs
- Deliverables: ORI (5 cm resolution) and DEM (50 cm resolution)
- Purpose: Creation of detailed urban geospatial datasets for planning, infrastructure development, and governance

## 5. OTHER MAPS

### I.STATE MAPS

The geographical map of a state depicts the state boundary, district boundaries, and sub-divisional boundaries, Major cities, towns, rivers, lakes, important monuments along with important transport routes like national and state highways and railways, important rivers, lakes for spatial reference. The Second Edition of Tamil Nadu State map (Tamil) and Third Edition (English) was published in 2025 on 1:1M scale

### II.OTHER GEOGRAPHICAL MAPS

These are small-scale maps covering larger area and published with themes for specific purposes. Various geographical maps available in vector format (Shape file) & PDF format are as follows:

- i. **Railway Map of India - Scale 1:3.5M:** This dataset provides comprehensive information about India's railway network. It includes data showing railway lines, stations, and important junctions across the country.
- ii. **Political Map of India - Scale 1:4M:** This dataset offers detailed information on India's political boundaries. It includes maps that delineate state and union territory borders, major cities, and administrative divisions.
- iii. **Road Map of India - Scale 1:2.5M:** This dataset features an extensive road network of India. It includes data highlighting national and state highways, important routes, and major cities.
- iv. **India & Adjacent Countries - Scale 1:2.5M:** This dataset includes detailed maps of India and its neighboring countries. It provides information on the road networks, major cities, and international borders.
- v. **Physical Map of India - Scale 1:4.5M:** This dataset showcases India's physical geography. It includes maps displaying topographical features such as mountains, rivers, plains, and plateaus.
- vi. **World Map - Scale 1:20M:** This dataset provides a global perspective with detailed world maps. It includes information on continents, countries, and major geographical features.

*Note: All area measurements presented in this document are derived from digital data (shape files) projected using the Lambert Conformal Conic (LCC) projection based on the World Geodetic System 1984 (WGS 84) datum.*
